DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The present invention is directed to a micro-speaker with dual suspensions. Independent claim 1 identifies the uniquely distinct feature of a second suspension made of a highly resilient and conductive leaf spring wherein a voice coil is attached to lower surface of the second suspension and a vibration plate is attached to an upper surface of the second suspension in combination with all the disclosed limitations of claim 1. The closest prior art, Kim (KR 1020010074076 A) teaches a dual suspension speaker but fails to teach a voice coil is attached to lower surface of the second suspension and a vibration plate is attached to an upper surface of the second suspension and Hideo (JP 2000-334378) teaches a dual suspension vibration converter but fails to teach a voice coil is attached to lower surface of the second suspension and a vibration plate is attached to an upper surface of the second suspension. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
